

TAREK SHEREEN DARWISH

Software Engineer — Applied Machine Learning & AI

Cairo, Egypt · tareksheren@gmail.com · +20 103 258 4030 · [linkedin.com/in/Tarekshereen](https://www.linkedin.com/in/Tarekshereen) · github.com/Tu2525 · tu2525.github.io

SUMMARY

Software engineer finishing a B.Sc. in Intelligent Systems Engineering, with applied ML spanning an explainable fraud-detection platform (SHAP attributions narrated by Gemini), a Gemini-Vision generative AI app, and a LLaMA-70B backend pipeline in production. Looking for a junior/graduate ML/AI role — fully remote or with relocation support.

TECHNICAL SKILLS

Data & ML: Machine Learning, Deep Learning, NLP, Computer Vision, LLM/RAG, Data Analysis (Pandas, Power BI, Tableau)

Frameworks: React, React Native, Flutter, Node.js, Flask, FastAPI, Django, TensorFlow, PyTorch, scikit-learn

Languages: Python, JavaScript/TypeScript, Dart, Kotlin, Java, C++, C, Rust, SQL

Cloud & DevOps: AWS, Cloudflare, Azure, Docker, CI/CD, Supabase, Firebase

EXPERIENCE

Generative AI Engineer, Digital Egypt Pioneers Initiative

Cairo, Egypt (Hybrid) · Nov 2025 – Jul 2026

- Built an explainable fraud-detection platform: a 310-feature classifier behind a FastAPI backend
- Layered Gemini over SHAP attributions to turn model output into plain-English risk explanations
- Shipped it end to end — Svelte frontend, Dockerized, deployed to Hugging Face Spaces

Backend & AI Engineer Intern, Aispeak

Madrid, Spain (Remote) · Jul 2025 – Jan 2026

- Built a backend pipeline routing user messages to Azure, processed by a LLaMA-70B model
- Stood up real-time messaging on Supabase; owned database schema design and API development

Backend Engineer Intern, Jiffy

Remote · Aug 2025 – Dec 2025

- Built core backend services: a multi-featured calendar and a containerized auth system in Docker
- Architected and documented RESTful APIs for new features, streamlining frontend integration

Instructor & Projects Contributor, Pixels Egypt Org.

Helwan, Egypt · Oct 2023 – Oct 2025

- Taught ML, Computer Vision and Flutter to 15+ students; 95% satisfaction, 80% project completion
- Contributed ML and dev work to student projects recognized at university and national competitions

Cross Platform Mobile Developer Intern, Link Development

Maadi, Egypt · Jul 2025 – Aug 2025

- Led interns building a Flutter e-commerce app with Clean Architecture, Riverpod and Firebase
- Managed delivery and code quality through feature-branch workflows and pull-request reviews

Data Analyst Intern, National Telecommunication Institute

Giza, Egypt · Dec 2024 – Mar 2025

- Cleaned and structured raw telecom datasets in Python/Pandas for exploratory and inferential analysis
- Built interactive Power BI and Tableau dashboards, using Power Query and DAX for custom metrics

PROJECTS

Healthica — Smart Band Health Monitor — Flutter, BLE, ESP32, TensorFlow Lite, Supabase

- 2nd place, Banha hackathon - Flutter app streaming ESP32 vitals over BLE, glucose predicted on-device

Atlas — Adaptive Tech Learning Assistant — Flutter, FastAPI, Gemma 3

- 1st place, Leaders of Tomorrow hackathon — AI mentor with a Gemma-3 backend that plans learning paths

AI Roast Master — SvelteKit, Cloudflare Workers/Pages/R2, Gemini 2.5 Flash Vision

- Webcam generative AI app for the Cloudflare 2026 AI Internship: Gemini Vision + TTS, fully serverless

EDUCATION & CERTIFICATIONS

B.Sc., Intelligent Systems Engineering, Helwan National University

Helwan, Egypt · 2022 – 2027 (expected)

Digital Egypt Pioneers Initiative: Generative AI Track (2025–26), Mobile Development Track (2024–25) | AWS Cloud Practitioner | Huawei HCIP-AI | Huawei ICT Associate, AI & Cloud | Machine Learning Specialization, Stanford | NLP, NTI | React Native Bootcamp, ITI
