TAREK SHEREEN DARWISH

Frontend / Full-Stack Engineer: React & TypeScript

Cairo, Egypt · tareksheren@gmail.com · +20 103 258 4030 · linkedin.com/in/Tareksheren · github.com/Tu2525 · tu2525.github.io

SUMMARY

Frontend-leaning software engineer finishing a B.Sc. in Intelligent Systems Engineering. Builds interfaces on live data: a React 19 and TypeScript doctor dashboard for a health monitoring system (Supabase Realtime, role-based access, Cloudflare Pages) and a React and Recharts industrial safety dashboard that refreshes every 2 seconds. Winner of the Youth Leaders Foundation (YLF) Hackathon 2026 and 2nd place at Banha, both with Healthica. Looking for a junior frontend or full-stack role, remote or with relocation and visa sponsorship.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Svelte/SvelteKit, Vite, Tailwind CSS, React Query, React Router, Recharts

Mobile: Flutter/Dart (Riverpod, Clean Architecture), React Native, native Android (Kotlin)

Backend & data: Python, Supabase (auth, Realtime, row-level security), Firebase, FastAPI, Flask, Node.js, REST APIs, SQL

Tooling & cloud: Git, Docker, CI/CD, Cloudflare Pages, Hugging Face Spaces, AWS, Azure

PROJECTS

Healthica: Smart Band Health Monitor · *Winner, YLF Hackathon 2026 (team of 5) · 2nd place, Banha Hackathon · React, TypeScript*

- Built the doctor web dashboard: 8 routes (login, sign-up with OTP verification, patient list, patient detail, alerts, settings, admin) with React Router and React Query, deployed on Cloudflare Pages.
- Live data from Supabase Realtime (device status, alerts, chat history) with 5 to 15 second query polling as a fallback, and Recharts line charts of each patient's vitals.
- Role-based UI over Supabase row-level security: doctors see only their assigned patients, admins assign doctors and change roles. Also built the Flutter patient app.

Risk AI: Industrial IoT Safety Monitor · *React, Vite, Recharts, Flask, SQLite, Docker, ESP32*

- React dashboard polling a Flask API every 2 seconds: ESP32 temperature, humidity, CO2 and acetone charts, a red alert overlay when predicted gas-leak risk turns critical, and an hour-of-day history chart.

Atlas: Adaptive Tech Learning Assistant · *Flutter, FastAPI, Gemma 3*

- 1st place, Leaders of Tomorrow hackathon: AI mentor that finds a learner's track, quizzes them and recommends next steps.

EXPERIENCE

Generative AI Engineer, Digital Egypt Pioneers Initiative — *Cairo, Egypt (Hybrid) · Nov 2025 – Jul 2026*

- Built the Svelte frontend and Dockerized FastAPI service for an explainable fraud-detection tool on Hugging Face Spaces: each flagged transaction gets a plain-English reason (Gemini over the top 3 SHAP factors, with a fallback when the API is down).

Cross Platform Mobile Developer Intern, Link Development — *Maadi, Egypt · Jul 2025 – Aug 2025*

- Led interns building a Flutter e-commerce app with Clean Architecture, Riverpod and Firebase; ran PR reviews.

Mobile App Developer, Digital Egypt Pioneers Initiative — *Cairo, Egypt (Hybrid) · Oct 2024 – May 2025*

- Designed and maintained native Android apps in Kotlin and cross-platform apps in Dart/Flutter.

Instructor & Projects Contributor, Pixels Egypt Org. — *Helwan, Egypt · Oct 2023 – Oct 2024, Mar 2025 – Oct 2025*

- Taught ML, Computer Vision and Flutter to 15+ students; 95% satisfaction, 80% project completion.

Backend & AI Engineer Intern, Aispeak — *Madrid, Spain (Remote) · Jul 2025 – Jan 2026*

- Built the message-routing backend to a LLaMA-70B model on Azure and real-time messaging on Supabase.

OPEN SOURCE

- Merged: librespot #1786 (small Rust bug fix). Open: right-to-left text rendering PRs to the Sonora music app and its gpui layer (sonora #880, gpui #18).

EDUCATION & CERTIFICATIONS

B.Sc., Intelligent Systems Engineering, Helwan National University — *Helwan, Egypt · 2022 – 2027 (expected)*

DEPI Generative AI (2025–26) and Mobile (2024–25) Tracks | AWS Cloud Practitioner | Stanford ML Specialization | React Native Bootcamp, ITI
