TAREK SHEREEN DARWISH

Mobile Engineer: Flutter, React Native & Native Android

Cairo, Egypt · tareksheren@gmail.com · +20 103 258 4030 · linkedin.com/in/Tareksheren · github.com/Tu2525 · tu2525.github.io

SUMMARY

Mobile engineer finishing a B.Sc. in Intelligent Systems Engineering, with Flutter and native Android (Kotlin) experience. Built the Flutter app for Healthica, a BLE smart band health monitor (Winner, Youth Leaders Foundation Hackathon 2026; 2nd place, Banha Hackathon), led interns on a bilingual Flutter e-commerce app at Link Development, spent 8 months on Kotlin and Flutter apps in the DEPI Mobile track, and taught Flutter to 15+ students. Seeking a junior mobile role, remote or relocation with visa sponsorship.

TECHNICAL SKILLS

Mobile: Flutter (Riverpod, Provider, Clean Architecture), Android (Kotlin), React Native, BLE, TensorFlow Lite

Backend & Cloud: Firebase (Auth, Firestore, FCM), Supabase, REST APIs, FastAPI, Docker, Azure, AWS, Cloudflare

Languages: Dart, Kotlin, Java, Python, JavaScript/TypeScript, SQL, C, C++, Rust

Practices & ML: Git feature branches and PR reviews, unit testing, TensorFlow/TFLite, scikit-learn, NLP

PROJECTS

Healthica: Smart Band Health Monitor · *Winner, YLF Hackathon 2026 (team of 5) · 2nd place, Banha Hackathon · Flutter, Riverpod, BLE, TensorFlow Lite, Supabase*

- Built the Flutter app (about 16k lines of Dart, Riverpod, feature-based structure) that streams vitals from an ESP32 band over BLE with flutter_blue_plus, including MTU negotiation and automatic reconnection with exponential back-off.
- Runs quantized TensorFlow Lite glucose forecast models (15, 30, 60 minutes, about 21 KB each) on the phone, so inference needs no server.
- Severity-tiered health alerts, Supabase auth with patient and observer roles, medication tracking, GSR breathing biofeedback, Telegram alerts to emergency contacts.
- Documented the BLE data contract with the ESP32 firmware (GATT service, JSON vitals and HRV payload).

Atlas: Adaptive Tech Learning Assistant · *Flutter, FastAPI, Gemma 3*

- 1st place, Leaders of Tomorrow hackathon. Flutter chat app (Provider) where an AI mentor predicts your learning track from the conversation, runs a quiz and recommends resources; Gemma 3 behind a FastAPI backend.

MOBILE EXPERIENCE

Cross Platform Mobile Developer Intern, Link Development — *Maadi, Egypt · Jul 2025 – Aug 2025*

- Led interns building a bilingual (English and Arabic) Flutter e-commerce app: Riverpod, Clean Architecture for orders, Firebase Auth with email and Facebook sign-in, live Firestore orders and push notifications
- Managed delivery and code quality through feature-branch workflows and pull-request reviews

Mobile App Developer, Digital Egypt Pioneers Initiative — *Cairo, Egypt (Hybrid) · Oct 2024 – May 2025*

- Designed and maintained native Android apps in Kotlin and cross-platform apps in Dart/Flutter
- Conducted unit testing and implemented Android security protocols for robust app performance

Software Engineer Intern, PETROBEL — *Nasr City, Egypt · Sep 2024 – Oct 2024*

- Collaborated on Flutter app enhancements that made the app 15% faster

OTHER EXPERIENCE

Generative AI Engineer, Digital Egypt Pioneers Initiative — *Cairo, Egypt (Hybrid) · Nov 2025 – Jul 2026*

- Built an explainable fraud-detection platform (XGBoost, SHAP, Gemini, FastAPI, Svelte), test ROC AUC 0.97, on Hugging Face Spaces

Backend & AI Engineer Intern, Aispeak — *Madrid, Spain (Remote) · Jul 2025 – Jan 2026*

- Built a backend pipeline routing user messages to Azure, processed by a LLaMA-70B model

Instructor & Projects Contributor, Pixels Egypt Org. — *Helwan, Egypt · Oct 2023 – Oct 2025*

- Taught ML, Computer Vision and Flutter to 15+ students; 95% satisfaction, 80% project completion

EDUCATION & CERTIFICATIONS

B.Sc., Intelligent Systems Engineering, Helwan National University — *Helwan, Egypt · 2022 – 2027 (expected)*

DEPI Mobile and Generative AI tracks | React Native Bootcamp, ITI | AWS Cloud Practitioner | Stanford ML Specialization | Huawei HCIP-AI
